**AMENDMENTS TO THE SPECIFICATION:**

Please replace the paragraph [0053] beginning at page 12, line 22, with the following rewritten paragraph:

-- FIG. 3i is a western blot analysis ~~designed for detecting basal levels of p100, p52, p65, RelB, c-Rel and IκBα in normal and NIK<sup>(MINUS)</sup> Ramos cells. This figure demonstrates marked reduction of basal p52 and a significant decrease in RelB and c-RelB as well as some reduction in p100 and IκBα in NIK<sup>(MINUS)</sup> Ramos cells as compared with normal Ramos cells showing that p65, whose expression is independent of NF-κB, occurs in NIK<sup>(MINUS)</sup> cells in normal amounts.~~--
